Resolution: GC07-70

The Canadian Medical Association will enhance its work on the issues related to health and the environment by: a. highlighting the work of physicians who participate actively in national and international activities associated with improving the environment; b. advocating for programs to prevent or reduce the human and environmental health impact from global climate change and environmental degradation; c. lobbying policy decision-makers to incorporate concerns for human health into current environmental research and all public policy initiatives and; d. strengthening its relationships with appropriate environmental health agencies, such as Environment Canada and the National Roundtable on the Environment and the Economy.
