- CMA Letter - Bill C-30 Implementation
- CMA Policybase - Canadian Medical Association
In light of the current need to accelerate the delivery of health care and improve patient outcomes, the Canadian Medical Association (CMA) supports the implementation of Bill C-30. This bill is designed to address the challenges faced by our health care system, particularly in terms of system funding and performance.

The bill aims to introduce new funding models and encourage innovation in the delivery of health care services. By doing so, it seeks to enhance the efficiency and effectiveness of our health care system, ensuring that resources are used more effectively and that patients receive the care they need.

The CMA believes that Bill C-30 can help create a more sustainable and responsive health care system, one that is better equipped to meet the needs of Canadians. It is important that we take action now to ensure that our health care system is robust, accessible, and adaptable to meet the challenges of the future.

The CMA encourages all stakeholders to support the implementation of Bill C-30, recognizing its potential to transform our health care system and improve the health outcomes of Canadians.
