**Executive Summary**

Update complete text from the Policybase, as an Authority — All major sections are retained, per the Canadian Medical Association policy on research and dissemination. The text below is not the final version of the document and is subject to change before official publication.

The future of health care will depend on its ability to be sustainable. The Canadian health care system has long relied on the principles of universality, accessibility, and quality, but it is now faced with new challenges, such as rising costs, population aging, and advances in medical technology.

The Canadian health care system is complex, with multiple stakeholders, including federal, provincial, and territorial governments, private insurers, and health care providers. Despite these challenges, the system has demonstrated resilience and adaptability, and there are many examples of successful innovations and reforms.

The Canadian Medical Association (CMA) has long been a voice for the health care system, advocating for improvements in access, quality, and cost. In this policy, the CMA presents a proposal for a comprehensive approach to sustainability, including:

1. **Health care financing**: The CMA recommends a fair and equitable system of health care financing that ensures access to care for all Canadians.
2. **Health care delivery**: The CMA calls for a system that is accessible, efficient, and responsive to the needs of Canadians.
3. **Patient-centered care**: The CMA advocates for patient-centered care, with a focus on coordination and integration of services.
4. **Public health**: The CMA supports strong investments in public health to prevent and manage chronic diseases.
5. **Research and innovation**: The CMA encourages innovation and research to improve health care outcomes and reduce costs.

In conclusion, the CMA believes that sustainability is achievable through a collaborative and innovative approach, involving all stakeholders in the health care system. By working together, we can ensure that the Canadian health care system remains accessible, affordable, and responsive to the needs of all Canadians.
