Dear Colleagues,

We are all acutely aware of the significant challenges facing our health-care system as a result of the COVID-19 pandemic. The medical profession, health-care workers, and the public are working together to ensure that all Canadians have access to the best possible care.

We are writing to ask you to consider the following recommendations to support the health-care system and the health-care providers who are on the front lines of this crisis:

1. **Increase funding for health-care systems:** The federal government should provide additional funding to provinces and territories to help cover the increased costs associated with responding to COVID-19.

2. **Support health-care providers:** The government should provide financial support to health-care providers, including hospitals, community health centres, and long-term care facilities, to help them meet the increased demand for services.

3. **Protect health-care providers:** The government should provide personal protective equipment (PPE) to health-care providers and ensure that they have the necessary resources to safely deliver care.

We strongly urge you to consider these recommendations and support the health-care system during this crisis.

Sincerely,

[Signature]

Canadian Medical Association

A Prescription for sustainability

By the Canadian Medical Association

The Canadian Medical Association is deeply concerned by the increasing burden of chronic diseases on the health care system in Canada. Chronic diseases, such as diabetes, heart disease, and cancer, are on the rise and represent a major challenge to the sustainability of our health care system. It is estimated that up to 70% of health care costs are related to chronic diseases.

The Canadian Medical Association (CMA) is calling for a national strategy to address the root causes of chronic disease in Canada. This strategy should include measures to promote healthy lifestyles, improve access to quality services, and support early detection and treatment.

The CMA recommends that the federal government commit to the following:

1. Establish a national strategy to combat chronic disease
2. Invest in public health initiatives to promote healthy lifestyles
3. Enhance primary care services and support chronic disease management
4. Increase federal funding for research on chronic disease

The CMA calls on all levels of government to take urgent action to address the growing burden of chronic disease in Canada.
