Environmentally Sustainable Health Systems in Canada

RATIONALS

The Canadian Medical Association (CMA) strongly believes that sustainable health systems are essential to achieving healthy outcomes for all Canadians. This is a report on the sustainability of the Canadian health system. The report addresses the issue of sustainability in the context of health care, and the report discusses the following aspects:

1. Environmentally Sustainable Health Systems in Canada

   The CMA has been working on this issue for many years, and has developed a comprehensive policy document on the topic. The report discusses the challenges and opportunities for environmentally sustainable health systems in Canada.

2. Population health, health equity, public health

   The report focuses on the importance of population health and health equity in sustainable health systems. It highlights the need for a systems approach to achieving these goals.

3. Health systems, system funding and performance

   The report examines the funding and performance of health systems in Canada, and discusses the need for more sustainable funding models.

The report highlights the importance of sustainable health systems in achieving good health outcomes for all Canadians, and provides recommendations for action.
