A PRESCRIPTION FOR SUSTAINABILITY  

EXECUTIVE SUMMARY

Aim: Provide a prescription for sustainability in Canadian health care that addresses the major issues of cost, quality, and access.

The Canadian Medical Association (CMA) has been involved in the development of a national health care strategy for over a decade. This strategy, known as the "Prescription for Sustainability," outlines a comprehensive approach to achieving a sustainable health care system in Canada. The strategy is based on the principles of equity, efficiency, and effectiveness.

Objectives:
1. To ensure that all Canadians have access to quality health care services.
2. To ensure that health care providers are paid adequately for their services.
3. To ensure that the financial resources available for health care are used efficiently.

Methods:
1. Focus on prevention and primary care to reduce the need for secondary and tertiary care.
2. Implement a single-payer system to ensure that all Canadians have access to health care services.
3. Use technology to improve the efficiency of health care delivery.

Results:
1. Significant improvements in health care outcomes.
2. Reduction in health care costs.
3. Increased public satisfaction with the health care system.

Conclusion:
The Prescription for Sustainability is a comprehensive strategy that can help ensure the sustainability of the Canadian health care system.

On behalf of the Canadian Medical Association and our more than 53,000 physician members
