A PRESCRIPTION FOR SUSTAINABILITY – PM-A, 2002

Executive Summary

The Canadian Health Care system is in crisis. To ensure the health care system is sustainable and continues to provide high-quality care, we must address the fundamental issues that have led to the current state of the system. These issues include, but are not limited to:

1. Over utilisation
2. Inadequate funding
3. Insufficient planning
4. Inefficient delivery systems

In order to address these issues, we recommend the following measures:

1. Implementing a national health care strategy
2. Increasing funding for the health care system
3. Improving the planning and delivery of health care services

We believe that these measures will help to ensure the sustainability of the Canadian Health Care system and provide high-quality care for all Canadians.

On behalf of the Canadian Medical Association and all those who support health care in Canada, we call for action to ensure the sustainability of the health care system.

Sincerely,

[Signature]

President, Canadian Medical Association
