Answering the Wake-up Call: CMA's Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

Submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health response to SARS has demonstrated the critical importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

The Federation of Canadian Medical Associates has made a series of recommendations to the National Advisory Committee on SARS and Public Health focused on the need to integrate health care and public health in order to ensure a coordinated, responsive and resource-effective health-care system.

Recommendations include: the need to establish a health-care framework that ensures effective communication and collaboration between the public and private sectors; the need to integrate public health and health care in order to ensure a coordinated, responsive and resource-effective health-care system; and the need to ensure that health care and public health are integrated in order to ensure a coordinated, responsive and resource-effective health-care system.

This recommendation emphasizes the importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

The Ontario Medical Association has made a series of recommendations to the National Advisory Committee on SARS and Public Health focused on the need to integrate health care and public health in order to ensure a coordinated, responsive and resource-effective health-care system.

Recommendations include: the need to establish a health-care framework that ensures effective communication and collaboration between the public and private sectors; the need to integrate public health and health care in order to ensure a coordinated, responsive and resource-effective health-care system; and the need to ensure that health care and public health are integrated in order to ensure a coordinated, responsive and resource-effective health-care system.

This recommendation emphasizes the importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

The Saskatchewan Medical Association has made a series of recommendations to the National Advisory Committee on SARS and Public Health focused on the need to integrate health care and public health in order to ensure a coordinated, responsive and resource-effective health-care system.

Recommendations include: the need to establish a health-care framework that ensures effective communication and collaboration between the public and private sectors; the need to integrate public health and health care in order to ensure a coordinated, responsive and resource-effective health-care system; and the need to ensure that health care and public health are integrated in order to ensure a coordinated, responsive and resource-effective health-care system.

This recommendation emphasizes the importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

The Alberta Medical Association has made a series of recommendations to the National Advisory Committee on SARS and Public Health focused on the need to integrate health care and public health in order to ensure a coordinated, responsive and resource-effective health-care system.

Recommendations include: the need to establish a health-care framework that ensures effective communication and collaboration between the public and private sectors; the need to integrate public health and health care in order to ensure a coordinated, responsive and resource-effective health-care system; and the need to ensure that health care and public health are integrated in order to ensure a coordinated, responsive and resource-effective health-care system.

This recommendation emphasizes the importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

The British Columbia Medical Association has made a series of recommendations to the National Advisory Committee on SARS and Public Health focused on the need to integrate health care and public health in order to ensure a coordinated, responsive and resource-effective health-care system.

Recommendations include: the need to establish a health-care framework that ensures effective communication and collaboration between the public and private sectors; the need to integrate public health and health care in order to ensure a coordinated, responsive and resource-effective health-care system; and the need to ensure that health care and public health are integrated in order to ensure a coordinated, responsive and resource-effective health-care system.

This recommendation emphasizes the importance of collaboration, expertise and expert participation in the health-protective system. With the new emphasis on the needs of the public, public health-system capacity and partnerships, a comprehensive and sustainable health-care response is essential.

Achieving Patient-Centred Collaborative Care

The Canadian Medical Association (CMA) has developed this policy to provide guidance and recommendations for healthcare professionals, policymakers, and stakeholders on how to promote patient-centred and collaborative care in the new healthcare landscape. The policy outlines the importance of teamwork, communication, and patient involvement in healthcare decisions.

Key Points:
- Collaboration between healthcare providers is essential for effective patient care.
- Patient involvement and decision-making are critical for personalized care.
- Interdisciplinary teams can improve care outcomes and satisfaction.
- Systemic changes are necessary to support collaborative care.

Objectives:
- Enhance patient satisfaction and care outcomes.
- Improve the coordination and quality of care.
- Foster a culture of collaboration among healthcare professionals.

Strategies:
- Implementing interdisciplinary care teams.
- Developing shared decision-making processes.
- Enhancing communication and information sharing.
- Evaluating and improving care processes.
- Supporting continuing professional development.

Conclusion:
The success of achieving patient-centred collaborative care depends on the commitment of healthcare professionals, policymakers, and stakeholders. By working together, we can create a healthcare system that truly prioritizes patient needs and outcomes.
