Submission in Response to the Consultation on the Canada Emergency Wage Subsidy

December 2020

The Canada Emergency Wage Subsidy (CEWS) is a crucial measure that provides support for businesses and organizations to keep their employees on the payroll during the pandemic. While the program has been helpful, it has some areas for improvement.

RECOMMENDATIONS 1

1. The government should consider increasing the maximum length of the program to allow for a more gradual transition to a new economic normal. This would provide businesses with more certainty and allow them to plan for the future.

2. The government should consider expanding the eligibility criteria to include more sectors and employers. This would ensure that more businesses can benefit from the program and help to stabilize the economy.

3. The government should consider increasing the wage subsidy rate to help businesses cover the higher costs of retaining employees during the pandemic.

4. The government should consider providing more flexibility in how businesses can use the wage subsidy. This could include options for businesses to use the subsidy to cover the costs of training or upskilling employees.

5. The government should consider providing more support for businesses that are struggling to maintain their operations during the pandemic. This could include financial assistance for rent or utilities, or other forms of support.

6. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

7. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

8. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

9. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

10. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

11. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

12. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

13. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

14. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

15. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

16. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

17. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

18. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

19. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

20. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

21. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

22. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

23. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

24. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

25. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

26. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

27. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

28. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

29. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.

30. The government should consider providing more support for businesses that are facing increased costs due to the pandemic, such as healthcare costs or supply chain disruptions.
