Disclosure of COVID-19 Vaccination Status by Physicians

In key sections:
1. The need to ensure that physicians can provide clear information to patients about their vaccination status.
2. The importance of maintaining patient confidentiality and trust.
3. The role of transparency in the context of public health and patient safety.

Points:
- Physicians should disclose their vaccination status to patients.
- This information can be included in the patient's medical record.
- Consent from patients for disclosure should be obtained.
- The disclosure should be voluntary and not mandatory.

The Canadian Medical Association (CMA) is a national, voluntary, non-partisan, non-profit organization that serves the nation's physicians through its provinces and territories. The CMA is dedicated to improving the health of all Canadians and cyber-safety in medicine.

In the midst of the COVID-19 pandemic, we call upon the federal and provincial governments to support rural, remote and Indigenous communities to ensure the safety and access to health care for all Canadians.

We recommend the following measures:

1. Support and provide adequate resources to rural, remote and Indigenous communities
2. Ensure access to high-speed internet
3. Enhance telehealth services
4. Provide additional funding for medical education and training
5. Support the mental health and well-being of health care providers

The CMA is committed to supporting the health care system during this unprecedented crisis. We call upon all levels of government to work together to protect the health and safety of health care providers and the communities they serve.

Yours sincerely,

[Signature]

CMA POLICY

RURAL AND REMOTE PRACTICE ISSUES

The Canadian Medical Association (CMA) believes that all Canadians should have access to health care services that are effective, safe, and appropriate to their needs. The CMA has repeatedly called for greater investment in primary health care services, including those provided by rural and remote practitioners. The CMA also supports policies that encourage physicians to practice in underserved areas.

The CMA has identified several key issues related to rural and remote practice, including:

- Access to health care services
- Compensation for rural practitioners
- Recruitment and retention of physicians
- Addressing workforce shortages

The CMA encourages federal and provincial governments to take action on these issues to ensure that all Canadians have access to quality health care services.

Bill Camp, M.P.
Chair, Standing Committee on Health
House of Commons

Re: Standing Committee on Health’s study on violence faced by healthcare workers

Dear Mr. Camp,

The Standing Committee on Health and Agriculture (PC:HC) has been working on the topic of violence faced by healthcare workers. The issue is complex and multifaceted, involving various factors such as patient behavior, workplace culture, and systemic issues.

The committee has conducted extensive hearings and received submissions from various stakeholders, including healthcare workers, patient advocates, and experts in the field. The research includes a literature review, case studies, and expert testimony.

The report highlights the need for a comprehensive approach to addressing violence in healthcare settings. It recommends enhancements to current policies and the development of new strategies to support healthcare workers.

The report concludes with a call to action for government, healthcare organizations, and regulatory bodies to take concrete steps to prevent workplace violence and improve working conditions for healthcare workers.

Sincerely,
