Auditing Physician Billings

CMA POLICY

Auditing Physician Billings

Purpose:

The CMA has decided to audit physician billings in order to ensure that they are accurate and in compliance with practice. This principle, referred to as the "principle of reasonableness," is intended to ensure that patients are not charged in excess of the reasonable fee.

In support of this principle, the CMA submitted to Finance Canada a proposal for the implementation of a device that would ensure patients are not charged in excess of the reasonable fee.

Recommendation:

The CMA recommends that the government implement a device that would ensure patients are not charged in excess of the reasonable fee.

References:

Annual report of the Canadian Medical Association

The CMA recommends that the government implement a device that would ensure patients are not charged in excess of the reasonable fee.

CMA POLICY

 GUIDING PRINCIPLES FOR PHYSICIANS RECOMMENDING MOBILE HEALTH APPLICATIONS TO PATIENTS

The document is designed to provide guidance to physicians about how to counsel patients about the use of mobile health applications.

TOPICS
Health information and e-health
Physician practice, compensation, forms

Background

- Mobile health applications, also known as health apps, have emerged in recent years. They are designed to provide health information, support for disease management, and other health-related services to patients.
- Mobile health applications can be accessed on smartphones, tablets, and other mobile devices.
- Mobile health applications can be used to track health data, monitor health conditions, and provide health education.
- Mobile health applications can be used to support patients in managing their health.
- Mobile health applications can be used to improve patient engagement and satisfaction.
- Mobile health applications can be used to support health care providers in delivering care.
- Mobile health applications can be used to support the public health system by providing information and education to the public.
- Mobile health applications can be used to support research and development.
- Mobile health applications can be used to support the management of chronic diseases.

Recommendations

- Physicians should provide information about mobile health applications and their potential benefits to patients.
- Physicians should be aware of the potential benefits and limitations of mobile health applications.
- Physicians should be aware of the potential for mobile health applications to improve patient engagement and satisfaction.
- Physicians should be aware of the potential for mobile health applications to support health care providers in delivering care.
- Physicians should be aware of the potential for mobile health applications to support the public health system by providing information and education to the public.
- Physicians should be aware of the potential for mobile health applications to support research and development.
- Physicians should be aware of the potential for mobile health applications to support the management of chronic diseases.
