We are writing to you today to alert you to a frightening and ominous trend in
Canada’s drug supply challenges. These shortages have worsened for the past
decade but have been exacerbated by Covid-19.

As has the pharmaceutical sector, we have seen several levels of governments,
both federal and provincial, taking a role in supply chain management. The drug
development and production of vaccines is, by its very nature, a public health
cause under our

The shortages of some drugs disrupt the ability of patients to receive the
care they need. The new Ministry of Health in British Columbia’s recent
publication of the COVID-19 Health Services Prioritization Frameworks,
emphasizes the critical importance of maintaining access to essential
pharmaceuticals.

We support the government’s decision to act, but it is important that these
tactics be targeted and effective.

At this time, it is clear that the federal government has concluded that it is a
critical and appropriate role for the federal government to take a leading role in
supply chain management. However, we urge caution in this approach.

We commend the government for its efforts and recognize the need for action.

Sincerely,

Canadian Medical Association
