Return to school during COVID-19

Policy recommendation

1. The CMA strongly recommends that communities ensure that all students have access to the vaccine provided in their jurisdiction. As schools are seen as safe environments, these locations should be considered a priority for vaccine delivery. Community health centres and schools should work closely together to ensure that vaccination opportunities are widely available and accessible to all students.

2. The CMA also recommends that schools implement measures to ensure the safety of students and staff. This includes promoting physical distancing, the use of masks, and frequent handwashing. Schools should also provide regular updates to students and parents on the status of the pandemic and any changes to the school’s policies and procedures.

3. The CMA continues to monitor the evolving situation and will provide updates as more information becomes available.

4. The CMA encourages all schools to implement comprehensive plans that prioritize the health and safety of all students and staff.

5. The CMA recommends that schools work closely with local health authorities and public health officials to ensure that all necessary precautions are taken to prevent the spread of COVID-19.

6. The CMA believes that the successful return to school during COVID-19 will require the collaboration of all stakeholders, including students, parents, teachers, and local health authorities.

CMA POLICY

Appropriateness in Health Care

Summary

The Canadian Medical Association (CMA) recognizes the importance of appropriateness in health care and advocates for policies that promote the optimal use of health care resources. This policy focuses on the importance of ensuring that health care is provided in a manner that is appropriate to individual patient needs and circumstances.

Recommendations

1. The CMA recommends that all health care providers develop and implement policies that promote the appropriate use of health care resources.
2. Health care providers should be encouraged to engage in quality improvement initiatives aimed at reducing waste and improving the efficiency of care delivery.
3. The CMA supports the development and implementation of national and regional guidelines for the appropriate use of health care resources.

Introduction

Effective and efficient use of health care resources is critical to the provision of high-quality care. Health care providers must be mindful of the potential for overuse and underuse of health care services. Appropriate care involves providing services that are necessary, timely, and cost-effective.

Policy

The Canadian Medical Association (CMA) supports the following principles:

- Quality care is provided to all individuals.
- Health care resources are used in a manner that is appropriate to individual patient needs.
- Health care providers have the knowledge and tools necessary to deliver appropriate care.

The CMA encourages health care providers to adopt evidence-based practices and to engage in ongoing education and training to ensure they are equipped to provide appropriate care.

The CMA also supports the development and implementation of policies and guidelines that promote appropriate use of health care resources.

The CMA recognizes that appropriate care is essential to achieving optimal health outcomes and reducing health care costs.
