CMA POLICY

Flexibility in Medical Training
(Update 2009)

The Canadian Medical Association promotes the highest standards of medical education, and encourages medical students and residents to participate in a wide variety of educational experiences. The Association supports the development and implementation of innovative educational strategies that enhance the learning experience and prepare medical students and residents for the challenges of their future careers. The Association also recognizes the importance of flexibility in medical training, and encourages medical schools and hospitals to provide opportunities for students and residents to pursue their interests and to develop their skills in a variety of settings. The Association welcomes the opportunity to work with medical schools and hospitals to improve the quality and effectiveness of medical education, and to ensure that medical students and residents receive the best possible preparation for their future careers.

BACKGROUND TO CMA POLICY

PHYSICIAN HEALTH

CMA STATEMENT ON PHYSICIAN HEALTH AND WELLNESS

Guiding Principles and Commitments for a Diverse Workforce

Guiding Principles

1. The role of medicine and physician health

The health of medicine is intertwined with the health of the physician. Physicians are not just health care providers but also members of the broader health care community. They are responsible for maintaining their own health and well-being, as well as for ensuring the health and safety of their patients. The CMA recognizes that physician health and wellness are essential to the delivery of high-quality care. Physicians are expected to take responsibility for their own health and well-being, and to seek appropriate professional help when needed.

2. The role of the physician in health care reform

Physicians play a key role in health care reform, working closely with other healthcare professionals and stakeholders to develop and implement policies that improve the effectiveness and efficiency of the healthcare system. The CMA supports policies that promote evidence-based practice, promote patient safety, and reduce health disparities.

3. The role of the physician in research and education

Physicians are actively involved in research and education, contributing to the advancement of medical knowledge and the improvement of patient care. The CMA supports policies that promote research and education, including policies that support the training and development of new physicians.

4. The role of the physician in public health

Physicians are key players in public health, working to prevent disease and promote healthy lifestyles. The CMA supports policies that promote public health, including policies that support immunization programs, smoking cessation efforts, and healthy lifestyle initiatives.

5. The role of the physician in health care delivery

Physicians are responsible for delivering high-quality care to their patients. The CMA supports policies that promote access to care, including policies that support the development of new models of care delivery, such as team-based care and telemedicine.

6. The role of the physician in the medical education system

Physicians play a key role in the medical education system, serving as role models for future physicians. The CMA supports policies that promote the development of innovative educational programs, including policies that support the integration of real-world experience into medical education.

7. The role of the physician in the management of chronic diseases

Physicians are key players in the management of chronic diseases, working with patients to develop and implement personalized treatment plans. The CMA supports policies that promote the management of chronic diseases, including policies that support the development of new medications and therapies.

8. The role of the physician in the prevention of medical errors

Physicians are responsible for preventing medical errors, working to identify and eliminate the factors that contribute to errors. The CMA supports policies that promote patient safety, including policies that support the development of new tools and technologies that can help prevent medical errors.

9. The role of the physician in the promotion of patient safety

Physicians are responsible for promoting patient safety, working to ensure that patients receive the care they need in a safe and effective manner. The CMA supports policies that promote patient safety, including policies that support the development of new tools and technologies that can help promote patient safety.

10. The role of the physician in the promotion of health equity

Physicians are responsible for promoting health equity, working to ensure that all patients have access to quality care, regardless of their socioeconomic status. The CMA supports policies that promote health equity, including policies that support the development of new programs and initiatives that can help promote health equity.
