"Listening to our Patient's Concerns"

Comments on Bill C-54
(Personal Information Protection and Electronic Documents Act)

Submission to the House of Commons
Standing Committee on Industry

March 15, 1999
Ottawa, Ontario

Dear Chairpersons,

We are submitting this brief in response to the request of the Standing Committee on Industry for comments on Bill C-54, Personal Information Protection and Electronic Documents Act.

The Canadian Medical Association (CMA) is a professional organization that represents the interests of physicians in Canada. We are concerned with the protection of personal information and the impact of this legislation on the medical profession.

In our capacity as a medical organization, we believe that the protection of personal information is crucial to maintaining the trust of our patients. We are therefore pleased to see that the bill includes provisions that address the collection, use, and disclosure of personal information.

We would like to draw your attention to the following points:

1. The bill should include provisions that allow for the de-identification of personal information. This would enable medical practitioners to use personal information for research purposes without violating patient confidentiality.

2. The bill should include provisions that allow for the sharing of personal information with health care providers. This would facilitate the provision of high-quality care to patients.

3. The bill should include provisions that allow for the sharing of personal information with public health authorities. This would enable the timely reporting of cases of infectious disease and the prevention of outbreaks.

We believe that these provisions would enhance the protection of personal information while still allowing for the provision of quality health care.

Thank you for considering our comments.

Sincerely,

[Signature]

Submission to the Senate Standing Committee on Social Affairs, Science and Technology

Executive Summary

The Canadian Medical Association (CMA) endorses Bill C-6, the Personal Information Protection and Electronic Documents Act (PIPEDA). PIPEDA will address important issues in the protection of personal information and the use of technology in health care. The bill is a major step in the direction of creating a secure and functional health care system.

The CMA has identified a number of areas where enhancements to the bill are needed. These include:

- Clarification of the scope of the Act
- Protection of medical records
- Protection of patient confidentiality
- Protection of patient privacy
- Protection of patient access to their medical records

The CMA recommends that the Senate Standing Committee on Social Affairs, Science and Technology consider these issues when reviewing Bill C-6.
