Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA’s Public Health Action Plan

Submission to the National Advisory Committee on SARS and Public Health
June 2003

EXECUTIVE SUMMARY

The public health response to the severe acute respiratory syndrome (SARS) has provided an opportunity to improve the health care system in Canada. The CMA, along with other health care stakeholders, has identified several key areas where improvements are needed to enhance health care delivery and to better prepare the health care system for future challenges.

The achievement of health care system improvements is critical to achieving better health outcomes for Canadians. The CMA is committed to working with all stakeholders to ensure that the necessary changes are implemented to improve the health care system in Canada.

The CMA recommends the following actions to improve the health care system:

1. Enhance the capacity of the public health system to respond to emerging infectious diseases and to prevent the spread of disease.
2. Improve the integration of public health and health care services to ensure a seamless approach to disease prevention and control.
3. Strengthen the communication and coordination between public health and health care providers to enhance the effectiveness of disease control measures.
4. Increase funding for public health programs to support the delivery of critical services.

The CMA is committed to working with all stakeholders to ensure that the necessary changes are implemented to improve the health care system in Canada.
