Answering the Wake-up Call: CMA's Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health response to SARS has demonstrated the critical importance of an effective and integrated public health system. The time is right for a national agenda to ensure that our health-care system is robust and our public health system is strengthened. The Canadian Medical Association (CMA) is committed to working with government, provincial and territorial government and all levels of health-care and public health organizations to ensure that the system is robust and the public health sector is strengthened.

The actions of the SARS Commission and the public health system have shown that a strong and effective public health system is required to contain and control outbreaks of infectious disease. The development of a national public health strategy and measures to strengthen the system must be supported by dedicated funding and a strong leadership role by Health Canada.

The CMA is committed to working with government, provincial and territorial government and all levels of health-care and public health organizations to ensure that the system is robust and the public health sector is strengthened.

The CMA is committed to working with government, provincial and territorial government and all levels of health-care and public health organizations to ensure that the system is robust and the public health sector is strengthened.
