Acting on today's and tomorrow's health care needs:
Prebudget submission to
CMA Policybase - Canadian Medical Association

CMA POLICY

ACHIEVING PATIENT-CENTRED
COLLABORATIVE CARE

The Canadian Medical Association (CMA) urges all levels of government to make sure that multiple levels of care (primary care, hospital care, community care) are provided to patients. The overall goal of health care is to ensure that patients are able to receive the best possible care. Health care should be delivered in a way that is comprehensive, efficient, and patient centred. The CMA recommends that health care be delivered in a way that is comprehensive, efficient, and patient centred.

Health care should be delivered in a way that is comprehensive, efficient, and patient centred. The CMA recommends that health care be delivered in a way that is comprehensive, efficient, and patient centred.

Health care should be delivered in a way that is comprehensive, efficient, and patient centred. The CMA recommends that health care be delivered in a way that is comprehensive, efficient, and patient centred.

Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health system is central to the health of our community. For the community to be healthy, individuals must be healthy and the environment in which they live must be healthy. The public health system is a key player in creating and maintaining public health.

CMA submits the following recommendations to the National Advisory Committee on SARS and Public Health:

1. The public health system should be improved and enhanced to be ready for when another SARS epidemic occurs.

2. Public health officials should be trained in the latest technologies and methods to ensure they are prepared to respond to future epidemics.

3. The public health system should be adequately funded to ensure it can respond to future epidemics.

4. Public health officials should have the authority to take actions necessary to control outbreaks.

5. Public health officials should have the resources to conduct research and development to improve public health systems.

CMA recommends that the Government of Canada make public health a priority and invest in the public health system to ensure it can respond to future epidemics.

In conclusion, the public health system is essential to the health of our community. It is important that the public health system is prepared and equipped to respond to future epidemics.

CMA is committed to ensuring that the public health system is prepared and equipped to respond to future epidemics.

CMA recommends that the Government of Canada make public health a priority and invest in the public health system to ensure it can respond to future epidemics.
