Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health system is essential to the health and wellbeing of all Canadians. It is a system of programs and services designed to promote health, prevent disease, and protect the public against health hazards. A well-functioning public health system is essential to the delivery of high-quality health care and the achievement of health equity. Effective public health systems are characterized by strong leadership, clear mandates, adequate resources, and effective partnerships.

The Canadian Medical Association (CMA) believes that a comprehensive public health system is a key component of a healthy, sustainable society. CMA endorses the development of a national public health strategy that includes a strong, integrated public health system.

CMA recommends: the establishment of a national public health strategy that includes a strong, integrated public health system; the allocation of adequate resources to public health activities; the strengthening of public health leadership; and the development of effective partnerships among all levels of government, the health sector, and the public.

The CMA welcomes the opportunity to present testimony to the House of Commons Standing Committee on Health and to share its views on the development of a national public health strategy.

Addendum to the Presentation to the House of Commons Standing Committee on Finance

December 2020

The Canadian Medical Association (CMA) presented the following submission on December 3, 2020, to the Standing Committee on Finance. The submission contained the following recommendations and supporting documents:

RECOMMENDATION 1
Full-time General Practitioners (FPGPs) and their medical assistants need to be recognized as essential workers. The government should consider expanding the scope of services provided by FPGPs, including mental health and substance use disorders.

RECOMMENDATION 2
The government should implement a comprehensive strategy to support the mental health and well-being of all Canadians.

RECOMMENDATION 3
The government should provide additional funding to support the development and implementation of e-health services.

RECOMMENDATION 4
The government should consider implementing a national pharmacare program to improve access to medications for Canadians.

RECOMMENDATION 5
The government should prioritize investment in research and development to advance public health initiatives.
