Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health system of Canada is a key to the health and well-being of the nation. It is vital that the system is robust, responsive, and effective. The Canadian Medical Association (CMA) has developed a Public Health Action Plan to address the challenges facing the public health system.

The Action Plan includes a series of recommendations to improve public health care in Canada. These recommendations are designed to ensure that the public health system is able to respond to the needs of the population and to provide effective and efficient care.

The Action Plan is divided into three main sections:

1. Health Systems, Health Care and Patient Safety
2. Population Health, Health Equity, Public Health
3. Health Systems, System Funding and Performance

The Action Plan is intended to provide a framework for improving public health care in Canada. It is hoped that the recommendations will be implemented by all levels of government and the public health care system.

The Action Plan is a living document that will be updated as new information becomes available. The CMA looks forward to working with all stakeholders to ensure that the public health system is able to meet the needs of the population.
