Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

CMA recommends that the federal government:  

1. Take full advantage of the opportunities offered by globalization to improve public health and health care delivery, while ensuring that national sovereignty and public health autonomy are preserved.

2. Develop a comprehensive national strategy to help countries in the developing world establish the necessary foundation for health care and public health delivery.

3. Ensure a stable and adequate source of funding for the public health system.

4. Implement a national disease surveillance system to monitor emerging and reemerging infectious diseases and provide early warning of pandemic threats.

5. Appreciate that a healthy, educated and skilled population is the economic and health care sector’s most important resource.

6. Address the needs and concerns of women in the workplace and in workplace health care delivery.

7. Achieve greater equity in health care delivery to ensure that all Canadians have access to quality health services and that vulnerable and disadvantaged populations have equal access.

8. Ensure a stable and adequate source of funding for the public health system.

9. Develop an effective national policy framework to ensure that all Canadians have access to quality health services and that vulnerable and disadvantaged populations have equal access.

10. Implement a comprehensive national strategy to help countries in the developing world establish the necessary foundation for health care and public health delivery.

The Canadian Medical Association (CMA) and the Canadian Nurses Association (CNA) are writing to the Council of the Federation (CoF) to express our concern about the future mandate of the Health Care Innovation Working Group (HCWG). We believe that the HCWG has played a valuable role in advancing health care innovation in Canada, and we hope that it will continue to do so in the future.

The HCWG has been tasked with examining ways to improve the efficiency and effectiveness of the health care system in Canada. This mandate is crucial because our health care system is facing significant challenges, including an aging population, increased demand for services, and limited resources.

We support the HCWG's efforts to identify solutions that can help improve the health care system in Canada. However, we believe that the HCWG needs to be given the proper resources and support to carry out its mandate effectively.

We urge the CoF to ensure that the HCWG has the necessary funding and personnel to conduct its work effectively. We also encourage the CoF to consider the feedback and recommendations provided by the HCWG in its decision-making processes.

We believe that the HCWG has the potential to make a significant contribution to the improvement of the health care system in Canada. We look forward to working with the CoF to ensure that the HCWG's mandate is carried out in a way that benefits all Canadians.

Sincerely,

In support of the Canadian Medical Association’s (CMA) Letter to the Council of the Federation regarding the Council of the Federation, we submit this parliamentary submission. The CMA strongly believes that health care is a fundamental right and should be a priority for all levels of government. We urge the federal government to work with the provinces and territories to ensure that health care is delivered in a way that is accessible, affordable, and of high quality for all Canadians.

The CMA is concerned about the current funding model for health care, which is based on a per capita payment to provinces and territories. This model does not adequately account for the varying needs of different populations and can lead to unequal access to healthcare services.

We recommend that the federal government explore alternative funding models that are more equitable and transparent. This could include a system where funding is based on need, such as the number of elderly and children in a population.

We also support the development of a national strategy for primary care, which is essential for ensuring that Canadians have access to high-quality, accessible, and affordable care.

In conclusion, the CMA strongly believes that health care is a fundamental right and should be a priority for all levels of government. We urge the federal government to work with the provinces and territories to ensure that health care is delivered in a way that is accessible, affordable, and of high quality for all Canadians.
