CMA's Public Health Action Plan

Answering the Wake-up Call: CMA's Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health response to SARS was declared by the community to be the largest public health emergency in the history of Canada. As a result of this response, many challenges and barriers were identified that need to be addressed to improve public health capacity and strengthen public health infrastructure across Canada.

Healthcare professionals require clear and up-to-date information to ensure the health of Canadians and to improve health outcomes in the community. Health professionals also need to be provided with a clear and comprehensive plan for future public health events.

The experience gained from the SARS epidemic serves as a reminder of the importance of public health preparedness. The SARS epidemic has highlighted the need for improved communication and coordination between public health agencies and other stakeholders.

CMA POLICY

CMA endorses the following key recommendations:

1. Establish a national and comprehensive public health policy to address future public health events.
2. Enhance the coordination and cooperation between public health agencies and other stakeholders.
3. Improve the communication and dissemination of public health information.
