Answering the Wake-up Call: CMA's Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

The public health system’s capacity is the foundation of our community’s health. Its ability to act and respond to prevent and control the spread of communicable diseases, ensure food safety, address public health emergencies, and improve health and quality of life is essential. Public health systems are complex and multifaceted, their role not limited to health care provision.

The CMA recommends that the following actions be taken:

1. Increase funding and support for public health systems and programs to enable them to fulfill their roles.
2. Establish a national advisory committee on public health systems to monitor the functioning of the system and provide guidance on improvements.
3. Develop a comprehensive framework for public health systems that includes indicators and measures of performance.

Appendices:

Appendix A: A Vision for Public Health Systems
Appendix B: Case Studies: Successes and Challenges in Public Health Systems
Appendix C: Glossary of Terms
Antimicrobial Resistance (AMR)
