**ADVANCE CARE PLANNING**

MISSION

Not the advent of technology planning for the beneficence of the sick, but as proof of the
increasing measure of personal autonomy. Doctors cannot, and should not, force
direct or indirect intervention on the patient. It is the task of the family, friends and
health professionals to determine whether the patient has the capacity to decide
about the performance of medical and / or surgical intervention, to determine the
value of the patient's health and to determine the patient's rights to refuse medical
interventions.

The patient has the right to choose his own doctor, his own health care provider,
and to make his own decisions about his own health.

The conformance of the patient's health care is based on the principle of free
choice and the principle of freedom of conscience.

The patient has the right to express their views about the treatment of their health,
and to participate in the decision-making process, and to be informed of their
diagnosis, treatment options and prognosis.

The patient has the right to refuse medical treatment, and to withdraw from medical
treatment at any time.

The patient has the right to privacy, confidentiality and respect for their dignity,
and the right to be treated with respect and dignity.

The patient has the right to be informed of their rights and responsibilities, and to
be advised on the consequences of their decisions.

The patient has the right to be informed of the potential risks, benefits and side
effects of any medical intervention, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of the availability of alternative medical
interventions, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their legal rights and responsibilities, and
to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to refer to a dispute resolution
mechanism, and to be advised on the consequences of their decisions.

The patient has the right to be informed of the availability of support services, and
to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to be informed of their
diagnoses, treatment options and prognosis, and to be advised on the consequences
of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of alternative medical interventions, and to be advised on the
consequences of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of support services, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to be informed of their
diagnoses, treatment options and prognosis, and to be advised on the consequences
of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of alternative medical interventions, and to be advised on the
consequences of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of support services, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to be informed of their
diagnoses, treatment options and prognosis, and to be advised on the consequences
of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of alternative medical interventions, and to be advised on the
consequences of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of support services, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to be informed of their
diagnoses, treatment options and prognosis, and to be advised on the consequences
of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of alternative medical interventions, and to be advised on the
consequences of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of support services, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

The patient has the right to be informed of their rights to be informed of their
diagnoses, treatment options and prognosis, and to be advised on the consequences
of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of alternative medical interventions, and to be advised on the
consequences of their decisions.

The patient has the right to be informed of their rights to be informed of the
availability of support services, and to be advised on the consequences of their
decisions.

The patient has the right to be informed of their rights to access their medical
records, and to be advised on the consequences of their decisions.

Answering the Wake-up Call: CMA’s Public Health Action Plan

CMA submission to the National Advisory Committee on SARS and Public Health

June 2003

EXECUTIVE SUMMARY

CMA is resubmitting its Public Health Action Plan to the National Advisory Committee on SARS and Public Health for further deliberation on the Policybase. The Plan will guide the Association’s efforts to improve public health outcomes and strengthen the health care system in Canada.

The Plan was developed in response to the SARS outbreak and is based on principles of health promotion, disease prevention, and preparedness. It outlines strategies to enhance public health capacity and improve health status in Canada.

The Plan includes recommendations for improving public health surveillance, strengthening the health care system, and promoting health literacy among Canadians.

The Plan will be updated annually to reflect new developments and emerging issues in public health.

This document was first published on Policybase on June 25, 2003.
