ACTIVE TRANSPORTATION

Active Transportation

The能夠 diminished mobility and
safety of the elderly, individuals with
shorter walking distances, younger
groups, and urban populations. Active
transportation improves health, as
well as reducing costs of health care.

Active transportation involves:
- Walking
- Cycling
- Using public transportation

Active transportation can also provide benefits to the environment by reducing
the need for personal vehicles.

Answering the Wake-up Call: CMA’s Public Health Action Plan
CMA submission to the National Advisory Committee on SARS and Public Health

EXECUTIVE SUMMARY

In a rapidly changing world, CMA recognizes the importance of a strong public health voice and the need for a collaborative, community-based approach to public health in Canada. This CMA submission to the National Advisory Committee on SARS and Public Health reflects our commitment to enhancing public health capacity and improving health information resources in Canada.

Vulnerable populations for whom health equity is critical are those who are affected by social determinants of health, such as poverty and social isolation. The CMA believes that these issues are vital to the implementation of a comprehensive public health system.

This document provides an overview of the CMA’s approach and recommendations for improving public health in Canada.
