**PHYSICIAN RESOURCE PLANNING** *(Updated 2015)*

The purpose of the policy is to ensure that the total number required of physician specialists in every region of Canada is consistent with the needs of the region and that resources are distributed in a manner that will most effectively meet the needs of patients in the region.

**Introduction**

The purpose of the policy is to ensure that the total number required of physician specialists in every region of Canada is consistent with the needs of the region and that resources are distributed in a manner that will most effectively meet the needs of patients in the region.

1. **Physician resource planning requires a pan-Canadian approach to the development of a sound medical workforce model.**
2. **Provincial jurisdiction as well as physician resource needs to match the needs of the population.**
3. **Strategic discipline-based workforces are needed to meet the needs of patients in the region.**
4. **Challenges in workforce planning to be taken into consideration when developing and maintaining workforce models.**

CMA POLICY

Flexibility in Medical Training (Update 2009)

The Canadian Medical Association (CMA) believes that the training of medical students, residents and fellows is critically important to the maintenance and development of a competent, accessible and efficient health care system. Therefore, the need to identify clear and unique professional standards that contribute to the delivery of quality care, including the non-medical aspects of care, has become increasingly urgent. These standards have been identified in the CMA’s Policy on Health Human Resources.
