(Personal Information Protection and Electronic Document Act)

Submission to the Senate Standing Committee on Social Affairs, Science and Technology

Nov. 27, 1999

Dr. Arthur Hurst
Senate of Canada Building
Ottawa, Ontario

Executive Summary

The Canadian Medical Association is concerned that the government be given the powers to access medical records and personal information without the consent of the patient. The proposed bill would allow the government to authorize the disclosure of personal information and medical records to third parties without the consent of the patient. The bill would also allow the government to obtain personal information and medical records from third parties without the consent of the patient.

The bill would also allow the government to authorize the disclosure of personal information and medical records to third parties without the consent of the patient. The bill would also allow the government to obtain personal information and medical records from third parties without the consent of the patient.

The bill would also allow the government to authorize the disclosure of personal information and medical records to third parties without the consent of the patient. The bill would also allow the government to obtain personal information and medical records from third parties without the consent of the patient.

The bill would also allow the government to authorize the disclosure of personal information and medical records to third parties without the consent of the patient. The bill would also allow the government to obtain personal information and medical records from third parties without the consent of the patient.

The bill would also allow the government to authorize the disclosure of personal information and medical records to third parties without the consent of the patient. The bill would also allow the government to obtain personal information and medical records from third parties without the consent of the patient.

CMA POLICY

Guiding Principles for the Optimal Use of Data Analytics by Physicians at the Point of Care

Executive Summary

Electronic records are being ever more widely in medical care in Canada. While physicians are generally confident about their abilities to design and use clinical information systems, this is not always the case when it comes to using these systems to develop and implement data analytics. This national consensus document is intended to provide physicians and other stakeholders with a common understanding of the principles and practices that should guide the use of data analytics by physicians in Canada.

The document outlines the following principles:

1. Data analytics should be used to improve patient care and public health outcomes.
2. Data analytics should be used to support evidence-based decision making.
3. Data analytics should be used to support the development and evaluation of clinical guidelines.
4. Data analytics should be used to support the development and evaluation of healthcare policies.
5. Data analytics should be used to support the development and evaluation of healthcare programs.
6. Data analytics should be used to support the development and evaluation of healthcare systems.
7. Data analytics should be used to support the development and evaluation of healthcare organizations.
8. Data analytics should be used to support the development and evaluation of healthcare professionals.

These principles are intended to provide a framework for the use of data analytics by physicians and other stakeholders in Canada.
