Global vaccine equity

Policy background

1. International humanitarian law requires states to ensure equitable distribution of COVID-19 vaccines. The Declaration on the Right to Essential Medical Services, adopted in 2001, requires states to ensure that their actions to combat diseases are consistent with human rights obligations. The United Nations has called for equitable distribution of COVID-19 vaccines.

2. The World Health Organization (WHO) has emphasized the importance of equitable access to COVID-19 vaccines. The WHO has called for a fair and equitable distribution of vaccines to ensure that all countries can access safe and effective vaccines.

3. The Global Vaccine Action Plan (GVAP) is a global initiative that aims to ensure equitable access to COVID-19 vaccines. The GVAP has set targets for vaccine distribution, including a target of 20% of the global population being vaccinated by the end of 2021.

4. The COVID-19 pandemic has highlighted the importance of global health security and the need for equitable access to vaccines. The pandemic has also highlighted the need for stronger international cooperation to address global health challenges.

5. The CMA recommends that governments and international organizations work together to ensure equitable access to COVID-19 vaccines. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

Recommendations

1. The CMA recommends that governments and international organizations prioritize equitable access to COVID-19 vaccines. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

2. The CMA recommends that governments and international organizations work together to ensure that vaccines are distributed fairly and equitably. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

3. The CMA recommends that governments and international organizations support the development and production of COVID-19 vaccines. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

4. The CMA recommends that governments and international organizations work together to ensure that vaccines are distributed fairly and equitably. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

5. The CMA recommends that governments and international organizations support the development and production of COVID-19 vaccines. The CMA recommends that vaccine distribution be guided by equitable principles, including the needs of vulnerable populations and low-income countries.

CMA Statement on Racism

https://policybase.cma.ca/link/policy14245

Policymakers in the health care system must stand against racism in all its forms. The creation of a safe and inclusive environment for all patients is a moral imperative. This commitment requires a commitment to ensuring that all patients receive the care they need, without discrimination.

The persistent and systemic racism experienced by people of colour highlights the need for ongoing education and training for health care professionals. This includes recognizing the impact of racism on individual and community health outcomes.

In light of the COVID-19 pandemic, the CMA has developed a framework to support ethical decision-making during this time. The framework is designed to help health care providers and organizations ensure the safety and well-being of all patients, while also addressing the complex ethical issues that arise in the context of a pandemic.
