Guidelines for physicians in interactions with industry / Recommendations for physician innovators

Guidelines for physicians in interactions with industry

See also companion policy Recommendations for physician innovators.

Recommendations: Physicians are working to ensure that unduly influenced patient care (e.g. through conflicts of interest) is minimized. In today's health care environment, complex ethical dilemmas often require that physicians consider the responsibilities that are presented to them by their work. Physicians and institutions can work together to ensure that the needs of their patients are met in ways that are consistent with the medical profession's ethical principles. The medical profession's ethical principles, as developed by the CMA, are intended to ensure the highest standards of medical care and to promote the well-being of patients. Physicians are encouraged to ensure that their work is conducted in a manner that is consistent with these principles. The medical profession's ethical principles, as developed by the CMA, are intended to ensure the highest standards of medical care and to promote the well-being of patients. Physicians are encouraged to ensure that their work is conducted in a manner that is consistent with these principles.
