CMA Statement on Racism

This is a statement of health and other medical professionals. The
recommendations are based on evidence and the best available
information. The recommendations are intended to guide profes-
sionals in their practice.

The profession of medicine is a trust of health and safety. This trust is
violated when patients are treated unfairly or unethically.

It is critical that health professionals understand and respect the
rights and needs of all patients. This includes recognizing that
some communities may experience health disparities.

We recommend that health professionals:

- Respect the cultural and linguistic diversity of patients
- Avoid making assumptions about patients based on their
  race, ethnicity, gender, or sexual orientation
- Work to reduce health disparities by listening to and
  addressing the needs of underserved populations
- Support policies that promote health equity for all

We call on all health professionals to:

- Advocate for policies that address health disparities
- Educate themselves and their colleagues about issues
  related to health disparities
- Collaborate with community organizations to
  improve health outcomes for underserved populations

By: Kamloops, BC

This statement was developed in collaboration with a diverse group of
health professionals and community members.
