Mandatory COVID-19 vaccination of health care workers

https://policybase.cma.ca/link/policy14449

Policy document

2021-08-21

Health human resources
Population health, health equity, public health

Full policy recommendation:
1. All health care workers should be encouraged to be fully vaccinated for COVID-19 and have regular booster doses.
2. Public health measures, such as mandatory vaccination, are an important tool in ensuring the health and safety of patients and health care workers.
3. Mandatory vaccination policies should be implemented in a way that respects the rights and freedoms of health care workers.
4. Health care providers should be proactive in providing education and support to employees to ensure compliance.
5. Health care organizations should be held accountable for ensuring that mandatory vaccination policies are effectively implemented.
