Interchangeability of vaccines (vaccine mixing)

Policy position recommendation:
1. The CMA recommends that the Canadian Advisory Committee on Immunization (ACCI) provide guidance on the interchangeability of vaccine doses in a manner that is consistent with the best available evidence and public health considerations.

In respect of vaccines:
1. Introducing new vaccines into the Canadian immunization schedule should be based on the best available evidence and public health considerations.

Interim Advisory Committee on Immunization (ACCI)

The ACCI is an advisory committee established under the Canadian Immunization Guide (CIG) to provide guidance on the use of vaccines. It is comprised of medical experts with experience in infectious diseases, immunology, virology, and public health. The ACCI provides recommendations to the Canadian Immunization Guide (CIG) on the use of vaccines in Canada.

CMA Statement on Racism

This is a living document of health care, health and not of analogy. The
most obvious of all these moral, social and political issues that
are truly at the heart of what constitutes and defines health care.

The profession of medicine is a guarantee of a people. This commitment requires
hygiene, the legal and healthy craft, to be valued and respected, and the
right to a renewed dignity.

It's critical to keep in mind that health and health care
are not only access to health care, but access to care.

In the end, we believe in the power of medicine.

We call on all Canadians to recognize the
importance of medicine, health care, and public health in
the context of their own health and well-being.

We urge all governments and health care providers
to take action to address the racism and systemic biases
that exist in the health care system.

To: Linda Smeeth
President, Canadian Medical Association

This is a living document that will be updated and amended as
new evidence and information become available.

Authorizing Cannabis for Medical Purposes

The regulations of cannabis use in the medical sector have been developed in a climate characterized by uncertainty and controversy regarding the medical benefits, risks, and appropriateness of its use. The Canadian Medical Association (CMA) has reviewed the evidence and developed policy recommendations for the medical use of cannabis.
