COVID-19 Vaccine Global Intellectual Property Policy

Policy position recommendation

1. The CMA recommends the Government of Canada participate in global dialogue, including the World Health Organization, the World Intellectual Property Organization, and the World Trade Organization, to achieve a temporary relaxation of intellectual property restrictions to increase vaccine production. This would support countries to meet their own needs while recognizing global responsibilities.

2. The CMA recommends the Government of Canada support a temporary multilateral Intellectual Property carve-out for vaccines under the Doha Declaration on Traditional Knowledge, Innovation and Health. This would ensure that Canada is aligned with global efforts.

3. The CMA recommends the Government of Canada support a temporary suspension of intellectual property rights in vaccines for the duration of the pandemic. This would increase vaccine availability and make vaccines accessible to all.

4. The CMA recommends the Government of Canada support a temporary suspension of intellectual property rights in vaccines for the duration of the pandemic. This would increase vaccine availability and make vaccines accessible to all.

5. The CMA recommends the Government of Canada support a temporary suspension of intellectual property rights in vaccines for the duration of the pandemic. This would increase vaccine availability and make vaccines accessible to all.

Interchangeability of vaccines (vaccine mixing)

Policy position/Recommendation

1. The Canadian Medical Association recommends that the interchangeability of vaccines be considered by health authorities in countries where multiple vaccines are available. This includes evaluating factors such as vaccine efficacy, safety, effectiveness, and the impact of vaccine shortages.

2. The Canadian Medical Association recommends that the interchangeability of vaccines be considered when planning for pandemic responses, ensuring that vaccines are used in the most effective and efficient manner possible.

Interchangeability of vaccines

1. Interchangeability of vaccines is determined by the characteristics of the vaccines, including their formulation, delivery, and storage requirements. Different vaccines may require different storage conditions, which can affect their interchangeability.

2. The Canadian Medical Association recommends that health authorities consider the interchangeability of vaccines when developing vaccination plans, ensuring that vaccines are used in the most effective and efficient manner possible.

Interchangeability of vaccines and vaccine mixing

CMA recommendations for
EMERGENCY FEDERAL MEASURES TO CARE FOR AND PROTECT CANADIANS DURING THE COVID-19 PANDEMIC

Submitted to the Minister of Finance
March 18, 2020

5c. Enhanced measures to support Canadians during the COVID-19 pandemic:

- Federal government should provide sufficient funding to support health systems and health care providers.
- Enhanced access to personal protective equipment (PPE) for health care providers.
- Support for mental health services.
- Enhanced support for vulnerable populations, including seniors, people with disabilities, and Indigenous communities.
- Support for vaccination programs.
- Enhanced support for research and development of new treatments and vaccines.
- Support for international efforts to control the pandemic.

The CMA strongly supports the following recommendations to address the needs of Canadians during the COVID-19 pandemic.
