Vaccine certificates

Policy position recommendation

1. The Canadian Medical Association encourages health care professionals to adopt a patient-centered approach when implementing mandatory COVID-19 vaccinations. It is important to ensure that patients have access to accurate information about the vaccine, its benefits, and potential risks.

2. The development and implementation of a mandatory vaccination policy should be based on evidence and risk assessment. It is crucial to consider the latest scientific data and public health recommendations.

3. Health care organizations should establish clear communication strategies to address patient concerns and promote trust in the vaccination process.

4. The CMA recommends that health care professionals provide patients with support and resources to help them make informed decisions about vaccination.

5. The CMA endorses the development of a fair and transparent process for assessing medical exemptions to mandatory vaccination requirements.

Interchangeability of vaccines (vaccine mixing)

Policies and recommendations

1. The Canadian Medical Association acknowledges that patients may seek care from more than one health care provider, including physicians and specialists, and may require a combination of treatments.

2. It is important to note that all vaccines, including COVID-19 vaccines, are subject to ongoing safety monitoring.

3. The Canadian Medical Association recommends that health care providers maintain their knowledge of the latest information and guidelines regarding vaccine interchangeability.

4. Patients should be informed of the benefits and risks associated with vaccine interchangeability.

5. Health care providers should be aware of the potential impact of vaccine interchangeability on the effectiveness of vaccines.

6. It is important to note that the Canadian Medical Association supports the use of vaccines to prevent the spread of diseases.

7. Patients should be encouraged to discuss vaccine interchangeability with their health care providers.

8. Health care providers should be aware of the potential impact of vaccine interchangeability on the immunization of individuals.

9. It is important to note that the Canadian Medical Association recommends that patients receive their vaccines from a single source.

10. Health care providers should be aware of the potential impact of vaccine interchangeability on the health care system.

11. It is important to note that the Canadian Medical Association supports the use of vaccines to prevent the spread of diseases.

12. Patients should be encouraged to discuss vaccine interchangeability with their health care providers.

13. Health care providers should be aware of the potential impact of vaccine interchangeability on the effectiveness of vaccines.

14. It is important to note that the Canadian Medical Association recommends that patients receive their vaccines from a single source.

15. Health care providers should be aware of the potential impact of vaccine interchangeability on the immunization of individuals.

16. It is important to note that the Canadian Medical Association supports the use of vaccines to prevent the spread of diseases.

17. Patients should be encouraged to discuss vaccine interchangeability with their health care providers.

18. Health care providers should be aware of the potential impact of vaccine interchangeability on the health care system.
