CMA recommendations for FEDERAL MEASURES TO CARE FOR AND PROTECT CANADIANS DURING THE COVID-19 PANDEMIC

Submitted to the Minister of Finance
March 16, 2020

5c  Ensure adequate resources are available to vulnerable groups

In the current pandemic, it is critical that vulnerable groups, who are more susceptible to COVID-19, have adequate resources to help them. This includes access to adequate healthcare, personal protective equipment, and other essential items. It is also important to ensure that vulnerable groups are not excluded from the pandemic response measures implemented by the federal government. Adequate resources should be allocated to vulnerable groups to help them cope with the pandemic.

6a  Communicate effectively with the public

Effective communication is crucial in managing a pandemic. The federal government should communicate clearly and consistently with the public to help them understand the risk and采取 appropriate measures. This includes providing accurate information about the pandemic, the measures being taken to control it, and how individuals can protect themselves. Effective communication also helps to build confidence in the government's response to the pandemic and encourages compliance with public health guidelines.

6b  Support the development of vaccines and treatments

The federal government should support the development of vaccines and treatments for COVID-19. This includes providing funding for research and development, as well as collaborating with international partners to accelerate the development of effective vaccines and treatments. The federal government should also work with pharmaceutical companies to ensure that vaccines and treatments are accessible to all Canadians, regardless of their financial status.

7c  Provide financial support to small businesses

Small businesses are critical to the Canadian economy and are particularly vulnerable to the impact of the pandemic. The federal government should provide financial support to small businesses to help them survive the pandemic. This includes offering loans, grants, and other forms of financial assistance to help businesses meet their operating costs and maintain employment levels.

8a  Support the healthcare system

The healthcare system is critical to the response to the pandemic. The federal government should support the healthcare system by providing funding for additional healthcare workers and resources. This includes funding for additional hospital beds, respiratory equipment, and other medical supplies. The federal government should also work with provincial and territorial governments to ensure that healthcare resources are adequately distributed to meet the needs of all Canadians.

9a  Adopt a proactive approach to trade

The federal government should adopt a proactive approach to trade to help the economy recover from the impact of the pandemic. This includes finding new markets for Canadian exports, as well as working with international partners to maintain open trade channels. The federal government should also support the development of new industries and markets to help the economy diversify and adapt to the changing global economic landscape.

9b 推行绿色和可持续的经济政策

绿色和可持续的经济政策对于应对气候变化和实现长期经济发展至关重要。政府应采取积极措施，推动低碳和可持续的经济政策。这包括投资于清洁能源、绿色技术以及促进绿色经济的发展。政府还应与其他国家合作，制定国际性的绿色经济政策，共同应对气候变化带来的全球挑战。
