Return to school during COVID-19

Policy recommendation:
1. The CMA urges governments to review current vaccine programs to implement measures that will help ensure access to vaccines for all school-aged children across Canada. This includes urgent measures to ensure that vaccine delivery systems are in place to respond to any changes in priorities for vaccine delivery.
2. Governments should consider the costs of vaccinating school-aged children and the potential health benefits, including reducing the risk of hospitalization and severe illness.
3. The CMA recommends that schools and school boards implement measures to ensure the safety of all students, staff, and community members.
4. The CMA calls for increased funding for public health programs, including vaccination programs, to support the safe return to school.
5. The CMA encourages parents, students, and school staff to participate in local decision-making processes to ensure that all voices are heard and that decisions are made in the best interests of all students.

Interchangeability of vaccines (vaccine mixing)

Policy Position Recommendation

1. The Committee recommends that the Canadian Medical Association (CMA) and relevant public health authorities should make recommendations to health-care providers and patients regarding the interchangeability of vaccines.

2. The Committee recommends that the interchangeability of vaccines should be based on the available evidence and expert consensus.

3. The Committee recognizes that the interchangeability of vaccines may vary depending on the specific vaccine and the population receiving it.

4. The Committee recommends that the interchangeability of vaccines should be evaluated on a case-by-case basis, taking into account the individual patient's health status and the specific vaccine being considered.

Interdepartmental Guidelines on Interchangeability (DGE)

The Committee recommends that the interchangeability of vaccines should be evaluated based on the available evidence, including clinical trials and expert consensus.

CMA Policy Statement on Racism

To reinforce the values of medical professionalism and to reaffirm the CMA’s commitment to quality care, patient safety, and ethics, it is essential to address the issue of racism within the healthcare system.

The CMA condemns racism in all its forms, including structural, institutional, and individual racism. We recognize that racism can lead to disparities in health outcomes and patient experiences, and we are committed to working towards eliminating these disparities.

Our commitment to diversity and inclusion is reflected in our policies and practices. We strive to create a workplace that is inclusive, respectful, and free from discrimination.

We encourage all healthcare professionals to recognize and challenge racism and to work towards creating a more equitable and just healthcare system.

Sincerely,

[Name]
