Return to school during COVID-19

Policy recommendation

1. The federal government and provincial and territorial governments should consider the recent evidence on schoolbased effectiveness of vaccines in reducing COVID-19 transmission and severity. The evidence suggests that school-based vaccination programs can be effective in suppressing COVID-19 transmission in schools andminimize the risks to students, teachers, and families. The federal government and provincial and territorial governments should consider implementing school-based vaccination programs as part of their broader strategies to suppress COVID-19 transmission in the community.

2. The federal government and provincial and territorial governments should consider supporting and incentivizing schools to implement vaccination programs. This could include providing financial incentives for schools that implement vaccination programs, as well as providing training and resources to support schools in implementing vaccination programs. The federal government and provincial and territorial governments should also consider supporting vaccination programs for students who do not have access to vaccination programs at home.

3. The federal government and provincial and territorial governments should work with schools and school boards to develop vaccination program plans. This could include identifying potential vaccination sites, developing vaccination schedules, and providing resources to support vaccination programs. The federal government and provincial and territorial governments should also consider working with schools and school boards to develop vaccination program plans that are consistent with local public health guidelines.

4. The federal government and provincial and territorial governments should consider providing support to schools to help them implement vaccination programs. This could include providing training and resources to support schools in implementing vaccination programs, as well as providing financial incentives for schools that implement vaccination programs. The federal government and provincial and territorial governments should also consider working with schools and school boards to develop vaccination program plans that are consistent with local public health guidelines.

Interchangeability of vaccines (vaccine mixing)

Policy document

Interchangeability of vaccines (vaccine mixing)

Policy position/Recommendation

1. The CMA recommends forwaned health care providers to be flexible in the use of different vaccines, including interchangeability of COVID-19 vaccines, and to use the best available evidence when making decisions.

2. The CMA recommends forwaned health care providers to use the best available evidence when making decisions and to use the best available evidence when making decisions.

3. The CMA recommends forwaned health care providers to use the best available evidence when making decisions and to use the best available evidence when making decisions.

Interchangeability of vaccines

1. Interchangeability of vaccines is a critical component of the COVID-19 vaccination program. It allows for the use of different vaccines, including interchangeability of COVID-19 vaccines, and to use the best available evidence when making decisions.

2. The CMA recommends forwaned health care providers to use the best available evidence when making decisions and to use the best available evidence when making decisions.

3. The CMA recommends forwaned health care providers to use the best available evidence when making decisions and to use the best available evidence when making decisions.

CMA Statement on Racism

This is an important statement on health care, health equity, and health. The
Racism Committee of the Canadian Medical Association (CMA) is concerned
about ongoing racial and systemic discrimination in the health care system and
wants to take actions to address this issue.

The committee is committed to addressing this issue and is working to create a
more inclusive and equitable health care system. The committee is also
working to ensure that health care providers are aware of the impact of racism
on patients and are taking steps to address it.

The CMA encourages health care providers to take steps to address this
issue, including:

- Providing culturally competent care
- Educating patients about how to address racism
- Implementing policies and procedures to prevent discrimination

The committee is committed to working with other organizations and
government agencies to address this issue and create a more inclusive and
equitable health care system.

To discuss this issue, please contact the CMA at info@cmaj.ca
