To: Dr. Jilain Vlasses
Director of Outreach

Re: May 16, 2003

Dear Dr. Vlasses,

We appreciate your interest in the policies and guidelines related to the medical education of residents in Canada. It is important to ensure that the training of future healthcare professionals is of high quality and meets the needs of our healthcare system.

To that end, the Royal College of Physicians and Surgeons of Canada has established standards for medical education, which include requirements for residency training programs. These standards are reviewed and updated periodically to reflect changes in healthcare delivery and the needs of patients.

The Canadian Medical Association (CMA) supports the implementation of these standards and encourages its members to participate in the development and improvement of medical education in Canada.

We would be happy to provide you with more information on this topic and answer any questions you may have.

Sincerely,

[Signature]

PHYSICIAN HEALTH

BACKGROUND TO CMA POLICY

CMA STATEMENT ON PHYSICIAN HEALTH AND WELLNESS

Guiding Principles and Considerations for a Different Agenda

What it is

The CMA’s renewed focus on the health and well-being of doctors and the entire health care system is reflected in its 2016 Policy Statement on Physician Health and Wellness (p13).

Why we need it

The recent focus on physician health has led to enhanced policy development at the federal level, as well as increased activity at the provincial and territorial level. This has significant implications for the CMA, which serves as an overarching policy and advocacy body for Canadian doctors.

LEADING PRINCIPLES

A broader understanding of physician health

- Promote and support initiatives that improve the health and well-being of doctors, including enhanced policies, programs, and resources.
- Foster a culture of confidentiality and respect for patient privacy.
- Encourage open dialogue and collaboration with stakeholders.

Physician health as a quality indicator

- Promote and support initiatives that improve the health and well-being of doctors, including enhanced policies, programs, and resources.
- Foster a culture of confidentiality and respect for patient privacy.
- Encourage open dialogue and collaboration with stakeholders.

Physician health as a shared responsibility

- Promote and support initiatives that improve the health and well-being of doctors, including enhanced policies, programs, and resources.
- Foster a culture of confidentiality and respect for patient privacy.
- Encourage open dialogue and collaboration with stakeholders.
