Mandatory COVID-19 vaccination of health care workers

Policy position recommendation:
1. All health care workers should be fully vaccinated for COVID-19 to ensure protection for their family, community, and themselves.
2. Health care organizations should develop comprehensive vaccination strategies that take into account the needs of all health care workers, including those with disabilities, those older than 65, and those who are pregnant or breastfeeding.
3. The Canadian Medical Association (CMA) supports the implementation of a mandatory COVID-19 vaccination program for all health care workers.
4. The CMA recommends that all health care workers be required to be fully vaccinated against COVID-19 before being offered employment in health care settings.
5. The CMA encourages health care organizations to provide education and support to health care workers to ensure they have access to the necessary information and resources to make informed decisions about their vaccination status.
