Check against delivery.
Disclosure of COVID-19 Vaccination Status by Physicians

1. The duty of care requires physicians to ensure that every patient is aware of their COVID-19 vaccination status.
2. Physicians should consider the patient’s right to know about their COVID-19 vaccination status.
3. When discussing vaccination status with patients, physicians should be transparent and honest.

- The patient has the right to know about their COVID-19 vaccination status.
- The physician has a duty to inform patients about their COVID-19 vaccination status.

Documents
The Canadian Medical Association (CMA) believes that medical training should be flexible enough to meet the needs of changing circumstances. This includes the ability to switch specialties, change institutions, or take a break from training. The CMA supports the implementation of a training model that allows for greater flexibility in the medical education system.

This policy provides guidance on the principles and standards that should be applied to ensure that medical training is flexible and meets the needs of trainees and patients. It also addresses the role of the treating physician in helping patients return to work after an illness.

Definitions
- **Trainee** - A medical student or resident who is enrolled in a medical training program.
- **Trainee Rotation** - A period of time during which a trainee is assigned to a particular institution or department.
- **Trainee Break** - A period of time during which a trainee is not engaged in medical training activities.
- **Trainee Return to Work** - The process by which a trainee returns to work after an illness.

The CMA recognizes the importance of supporting trainees in their transition from medical education to professional practice. Therefore, it is important to ensure that medical training programs are flexible and responsive to the needs of both trainees and patients.
