CMA Statement on the Governance of Health Information: A patient-partnered health information governance framework

https://policybase.cma.ca/link/policy14485

POLICY TYPE Policy document
DATE 2022-06-29
TOPICS Health information and e-health

WHAT IT IS
The purpose of this statement is to advance the development of a patient-partnered health information governance framework that articulates the principles, roles, and responsibilities of all stakeholders in the governance of health information. The framework is intended to provide a clear, practical, and comprehensive approach to governing health information, ensuring that it is used effectively and ethically.

The framework aims to create a culture of transparency and accountability in health information governance, with a focus on meaningful and informed participation of patients and partners.

1. Transparency: Patients and partners should have access to the same level of information as healthcare providers, and their interests should be considered in decisions that impact them.
2. Consent: Patients should provide informed consent for their health information to be shared, and their preferences should be respected.
3. Security: The confidentiality and security of health information must be protected, and appropriate safeguards should be in place to prevent unauthorized access.

For more information, please visit the Canadian Medical Association’s website on health information governance.

Appearance before the House of Commons Standing Committee on Health

Dr. Kathleen Smart
President of the Canadian Medical Association

May 9, 2022

Thank you very much.

I’d like to talk about the importance of ensuring that our health care system is able to meet the needs of all Canadians, particularly when it comes to the allocation of resources.

We also need to ensure that the system is transparent and that the decisions made are based on evidence and expert opinion.

Furthermore, it is important to ensure that the system is accountable and that there is a mechanism in place to hold those responsible for making decisions to account for their actions.

Thank you.
