Executive Summary

The comments of the Canadian Medical Association (CMA) note the need for clear rules to govern the sharing of personal health information. The act should be mandatory, with the consent of the individual involved. The transfer of records to a third party should be prohibited, and serious breaches should be penalized. The act should not be interpreted as a way to avoid existing mandatory disclosure requirements. Health information professionals must be aware of their role in upholding the individual's right to privacy. It is important to maintain the confidentiality of health information in the electronic and non-electronic domains. The act should be reviewed after five years to ensure its effectiveness.
