CMA Statement on the Governance of Health Information: A patient-partnered health information governance framework

https://policybase.cma.ca/link/policy14485

WHAT IT IS:

The purpose of this statement is to advance the development of a patient-partnered health information governance framework that recognizes the importance of patient, family and public engagement in health information management. The framework is intended to support decision-making and policy development that is informed by patient, family and public perspectives and values.

1. Support patient, family and public engagement in health information management decisions, including the development of policies and practices that reflect patient, family and public priorities.
2. Ensure that health care providers and organizations have access to relevant patient, family and public perspectives when making decisions about health information management.
3. Promote partnerships between health care providers, organizations and patients, families and communities to ensure that health information is used in ways that support patient, family and public health.

KEY POINTS:

1. The development of the framework is informed by patient, family and public perspectives and values. This is achieved through the use of co-design and co-development processes that involve patients, families and communities in the design and implementation of health information management policies and practices.
2. The framework is intended to support decision-making and policy development that is informed by patient, family and public perspectives and values.
3. The framework is intended to support the development of a patient-partnered health information governance framework that reflects patient, family and public priorities.

Executive Summary

The comments of the present government on the bill for the personal information protection and electronic documents act are as follows:

The bill for the personal information protection and electronic documents act is a good beginning to protect the rights of patients in the electronic information age. However, it is important to ensure that the bill is not used to circumvent the rights of patients and to ensure that the bill is not used to protect the interests of the health care system. The bill should be amended to ensure that patients have the right to access their own medical records and that the information is used only for the purposes for which it is intended. The bill should also be amended to ensure that the health care system is not used to restrict the rights of patients.
