"Putting Patients First"

Comments on Bill C-6
(Personal Information Protection and Electronic Documents Act)

Submission to the Senate Standing Committee on Social Affairs, Science and Technology

Nov 27 1999

Cherie Oates

Executive Summary

The comments in this paper are based on the belief that patient health and safety are paramount. Patients have a right to privacy, which is meant to protect the confidentiality of personal health information. Incidents of identity theft have highlighted the need for stronger privacy legislation. The act would be an important step forward in protecting personal health information. It would provide a clear framework for the management of personal health information in a manner that would respect the privacy of individuals. It would also provide a mechanism for individuals to address concerns about the use of their personal health information. This is important in light of the recent increase in identity theft incidents. The proposed legislation would provide a framework for the protection of personal health information and would be an important step forward in protecting personal health information.
