TOPICS
Health information and e-health

WHAT IT IS
The purpose of this statement is to describe the characteristics of a patient-partnered health information governance framework that is relevant to the virtual care setting.

1. The framework should be developed in a collaborative manner, involving patients, providers, and other stakeholders.
2. It should be based on the principles of transparency, accountability, and patient-centeredness.
3. It should ensure the confidentiality, integrity, and availability of health information.
4. It should provide for secure and efficient access to health information.
5. It should facilitate the use of health information for clinical decision-making.
6. It should support the education of health professionals.
