Policy position recommendation
1. While the Canadian Medical Association (CMA) supports efforts to promote vaccine mandates, including in the healthcare sector, such mandates should be voluntary for healthcare workers.
2. The CMA supports the development of a comprehensive, evidence-based approach to vaccine mandates, taking into account the potential for conflict and harm.
3. The CMA recommends that vaccine mandates be implemented in a manner that is consistent with Canadian human rights law, including the principles of non-discrimination and equality.
4. The CMA encourages the public and healthcare workers to be informed about the benefits and risks of vaccines, and the options available for vaccine refusal.
5. The CMA supports the development of educational programs to increase awareness and understanding of the importance of vaccination.

Global vaccine equity

Policy position recommendation:
1. Canada’s national health agencies should encourage the use of alternative forms of vaccination in remote, rural and northern areas, including mobile clinics and home visits.
2. National and international health agencies should encourage the use of alternative forms of vaccination in remote, rural and northern areas, including mobile clinics and home visits.
3. National and international health agencies should encourage the use of alternative forms of vaccination in remote, rural and northern areas, including mobile clinics and home visits.
4. National and international health agencies should encourage the use of alternative forms of vaccination in remote, rural and northern areas, including mobile clinics and home visits.
5. National and international health agencies should encourage the use of alternative forms of vaccination in remote, rural and northern areas, including mobile clinics and home visits.

Implementation:
1. Develop a national strategy for remote, rural and northern areas, including mobile clinics and home visits.
2. Develop a national strategy for remote, rural and northern areas, including mobile clinics and home visits.
3. Develop a national strategy for remote, rural and northern areas, including mobile clinics and home visits.
4. Develop a national strategy for remote, rural and northern areas, including mobile clinics and home visits.
5. Develop a national strategy for remote, rural and northern areas, including mobile clinics and home visits.

CMA Policybase - Canadian Medical Association
Return to school during COVID-19

Return to school during COVID-19

Introduction

The pandemic has demonstrated that vaccination is a critical component of any strategy to reopen schools safely and effectively. The health and safety of all members of the school community is paramount in the context of the COVID-19 pandemic. This policy provides guidance for schools and school boards in planning and implementing a safe return to school during the pandemic.
Interchangeability of vaccines (vaccine mixing)

Policy position recommendation:

1. The Canadian Medical Association recommends that the interchangeability of vaccines be considered when planning the delivery of vaccines. This includes the use of different vaccines in different populations and different settings.

2. The interchangeability of vaccines should be based on rigorous scientific evidence and should be consistent with the principles of public health and patient safety.

3. The interchangeability of vaccines should be facilitated by clear and transparent communication to healthcare providers and the public.
