CMA POLICY
Cannabis for Medical Purposes

Policy

The Canadian Medical Association (CMA) has always recognized the unique requirements of those individuals suffering from terminal illness or chronic disease for which conventional therapies have not been effective and in many cases are contraindicated.

Faced with the rapid number of concerns, primarily relating to the inability to support the medical use of cannabis, the College of Family Physicians of Canada, the Canadian Medical Association, the Canadian Nursing Association, the Canadian Paediatric Society, the Canadian Psychiatric Association, the Canadian Osteopathic Association, the Canadian College of Family Physicians (CCFP), the Canadian College of Family Physicians (Ontario), the Canadian College of Family Physicians (Quebec) and the Canadian College of Family Physicians (Saskatchewan) have taken the following position:

The College endorses the following recommendations:

1. Support the advancement of scientific knowledge about the medical use of cannabis.
2. Support the improvement of access to high quality cannabis to patients who may benefit from its use.
3. Support the expansion of knowledge to patients who may benefit from cannabis.
4. Support the advancement of scientific knowledge about the health implications of cannabis use.
5. Support the advancement of scientific knowledge about the safety and efficacy of cannabis.
6. Support the advancement of scientific knowledge about the social implications of cannabis use.
7. Support the advancement of scientific knowledge about the economic implications of cannabis use.
8. Support the advancement of scientific knowledge about the legal implications of cannabis use.
9. Support the advancement of scientific knowledge about the environmental implications of cannabis use.
10. Support the advancement of scientific knowledge about the political implications of cannabis use.

The College further urges the following actions to improve access to high quality cannabis for patients:

1. Support the advancement of scientific knowledge about the medical use of cannabis.
2. Support the improvement of access to high quality cannabis to patients who may benefit from its use.
3. Support the expansion of knowledge to patients who may benefit from cannabis.
4. Support the advancement of scientific knowledge about the health implications of cannabis use.
5. Support the advancement of scientific knowledge about the safety and efficacy of cannabis.
6. Support the advancement of scientific knowledge about the social implications of cannabis use.
7. Support the advancement of scientific knowledge about the economic implications of cannabis use.
8. Support the advancement of scientific knowledge about the legal implications of cannabis use.
9. Support the advancement of scientific knowledge about the environmental implications of cannabis use.
10. Support the advancement of scientific knowledge about the political implications of cannabis use.

The Canadian Medical Association thanks you for this opportunity to participate in the government’s public consultation on proposed front-of-package labelling. We appreciate the opportunity to provide comments. We are concerned that Canadian health care professionals would be unable to access the information necessary for safe and informed prescribing and dispensing. From the perspective of the Canadian Medical Association, the proposed requirements for front-of-package labelling are not consistent with the principles that underpin Canadian health care and public health care policy: access to information, patient safety, and the health care system where patients are always at the forefront. 

The Canadian Medical Association urges the government to consider public and patient safety as a priority in the legislative process. We invite you to the following guidelines.

The Canadian Medical Association recommends that

1. The government consider the information that is currently available on the Canadian Medical Association and other health care professions;

2. The government consider the broader range of information that is currently available on the Canadian Medical Association and other health care professions;

3. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

4. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

5. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

6. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

7. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

8. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

9. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

10. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

11. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

12. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

13. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

14. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;

15. The government consider the range of information that is currently available on the Canadian Medical Association and other health care professions;
