Global vaccine equity

Policy recommendations:
1. Support the achievement of vaccine equity across all countries. The CMA recommends that international vaccine sharing continue to be achieved through the World Health Organization’s Vaccine Equity and Allocation framework, with a focus on maximizing global public health benefits.
2. Promote vaccine equity as a human right and a key component of global health security. The CMA encourages the development of mechanisms to ensure that vaccine distribution is fair and equitable, with priority given to populations with the highest need.
3. Support research and development efforts to improve vaccine efficacy and ensure equitable access.

Background:
Vaccination is a key strategy to control and eliminate vaccine-preventable diseases. However, global vaccine equity is currently a major challenge. Despite the availability of safe and effective vaccines, many countries continue to face significant gaps in vaccine coverage.

1. Global vaccine equity is essential to control and eliminate vaccine-preventable diseases.
2. The COVID-19 pandemic has highlighted the urgent need for global vaccine equity.
3. The CMA supports the World Health Organization’s (WHO) COVAX initiative, which aims to ensure equitable access to COVID-19 vaccines.

The CMA encourages health providers to advocate for global vaccine equity and to collaborate with stakeholders to develop and implement strategies to address the challenges.

Return to school during COVID-19

Policy recommendation

1. The Canadian Medical Association (CMA) recommends that
cyclists, except for essential workers, avoid cycling in the school
environment to reduce the risk of exposure to COVID-19.
2. Schools should implement measures to reduce the risk of
transmission of COVID-19, such as physical distancing, mask
wearing, and increased hygiene.
3. The CMA recommends that schools implement measures to
reduce the risk of transmission of COVID-19, such as physical
distancing, mask wearing, and increased hygiene.
4. The CMA recommends that schools implement measures to
reduce the risk of transmission of COVID-19, such as physical
distancing, mask wearing, and increased hygiene.
