Full policy recommendation

1. The Canadian Medical Association (CMA) encourages all Canadians to stay healthy, especially during the COVID-19 pandemic, by getting vaccinated. The CMA recommends that all Canadians, including those who are in school, should receive their COVID-19 vaccine as soon as possible. The CMA supports the provision of individualized care for all Canadians, including those who are in school, in order to ensure the safety and well-being of all students.

2. The CMA encourages schools to maintain healthy practices, such as physical distancing, mask-wearing, and frequent handwashing, to reduce the risk of transmission of COVID-19 and other respiratory illnesses. The CMA recommends that schools implement policies and procedures to ensure the safety and well-being of all students, including those with underlying health conditions.

3. The CMA recommends that schools provide adequate resources to support the mental health and well-being of all students, including those who are in school, during the COVID-19 pandemic. The CMA encourages schools to provide mental health supports, such as counseling services and peer support programs, to all students.

4. The CMA recommends that schools maintain open communication with all stakeholders, including parents, students, and community members, to ensure the safety and well-being of all students.

5. The CMA encourages all Canadians to continue to follow public health guidelines, such as physical distancing and mask-wearing, to reduce the risk of transmission of COVID-19.

CMA Policybase - Canadian Medical Association

p. 12
Interchangeability of vaccines (vaccine mixing)

1. The Canadian Medical Association recommends that the interchangeability of vaccines be based on evidence-based best practices.
2. When mixing vaccines, it is important to consider the efficacy and safety of the combined doses.
3. Interchangeability of vaccines should be decided on a case-by-case basis, with consideration of the specific circumstances.

Interchangeability of vaccines (vaccine mixing)

Policy recommendations:
1. The Canadian Medical Association recommends that the interchangeability of vaccines be based on evidence-based best practices.
2. When mixing vaccines, it is important to consider the efficacy and safety of the combined doses.
3. Interchangeability of vaccines should be decided on a case-by-case basis, with consideration of the specific circumstances.
