Mr. Lyndon Harris, MP
Chair, Legislative Committee on Bill C-30
Legal Affairs, House of Commons
Parliament Hill
Ottawa, Ontario

Dear Mr. Harris,

The Canadian Medical Association (CMA) is pleased to participate in the review of Bill C-30, the Clean Air Act. The CMA, founded in 1867, considers itself one of Canada’s most respected health organizations. Approximately 60,000 physicians in Canada are members of the CMA. As health professionals, we are concerned with the quality of health care in Canada and the health and well-being of all Canadians.

The Environment and your Health

The environment is a key determinant of a population’s health and the medical profession has a responsibility to ensure that policies and decision-making are evidence-based and related to public health outcomes. The CMA supports the principles of the Ottawa Charter for Health Promotion, which recognizes the essential role of healthy public policy in addressing the social determinants of health.

The CMA supports the statement that "environmental health is a determinant of health". The CMA endorses the principles of the Ottawa Charter for Health Promotion and the CMA supports the statement that "environmental health is a determinant of health". The CMA supports the principles of the Ottawa Charter for Health Promotion, which recognizes the essential role of healthy public policy in addressing the social determinants of health.

Determining the Impact of Chemical Contamination on Human Health

Background

Inhalation or exposure to toxic levels of chemicals can negatively affect human health. The Canadian Medical Association (CMA) recognizes the importance of addressing the issue of chemical contamination to protect public health. This policy outlines the CMA's position on the importance of addressing chemical contamination in the workplace, community, and environment.

Scope

This policy applies to all chemical contamination scenarios, including those in occupational settings, leisure activities, and environmental exposures.

Recommendations

1. Increases public awareness and education about chemical contamination risks
2. Encourages the development of policies and regulations to mitigate chemical contamination
3. Supports research on the impact of chemical contamination on human health

Conclusion

Chemical contamination is a significant public health concern. The CMA urges all stakeholders to work together to prevent and address chemical contamination to protect and improve public health.
